**Subject:** RE: checking in

Hi Rusty,

I have attached the break outs which should give you a thorough picture of our findings. The core data is a work in progress and is not updated enough for this year to share. I have hired a research assistant and one of their first and primary tasks will be to update and maintain the spreadsheet.

Here are the terms under which I can share the data with you: WildCare gives you permission to view, copy, print and distribute WildCare's intellectual property subject to restrictions set forth in these terms, and the following conditions:

- Any citing of the data or portion thereof, must attribute ownership of all intellectual property rights to WildCare's Rodenticide Diagnostics & Advocacy Program.
- You may establish a hypertext link to the data from your website so long as the page containing the link properly attributes the linked site to WildCare and does not in any way imply WildCare's sponsorship, approval or endorsement of your site.
- No other use of the data within the site or portion thereof is permitted without the express written consent of WildCare.

I look forward to speaking with you on Tuesday at 2:00 PM EST/11:00 AM PST. Please call 415-456-7283 and ask for me at the front desk. Thank you.

Kelle

Hello Kelle,

I will add something to our calendars for Tuesday at 2:00 PM EST/11:00 AM PST. Is 415-456-7283 the number we should call you at? Will you be able to send us the core data and break outs you mention prior to the call?

Best,  
Rusty

**Subject:** RE: checking in

Hi Rusty,

Tuesday 7/16 works for me. Any time after 11:00am PST / 2pm EST that day is fine and I won't schedule anything else that day until we confirm.

I just heard today that Malibu passed a Resolution similar to those passed in California's Bay Area Cities: Richmond, Albany and Berkeley. The

Resolutions ask for a voluntary removal of rodenticides from retailers shelves by urging local businesses to discontinue the sale of rat and mouse poisons the EPA has deemed pose an unreasonable risk to wildlife, pets and children. Fortunately, the resolutions aren't specific to the 12 d-Con products and just ask for a removal of all rodenticides. We also have cities and counties, including Marin where WildCare is located, that have adopted an IPM approach to dealing with conflicts with wildlife, specifically problems with rodents. We can talk more about this during the call.

**Subject:** RE: checking in

Good Morning Kelle,

On the call would be Laura (my team leader for rodenticides), Scott (our counsel for rodenticides), and potentially my branch chief Neil. I think our call can be more productive if we review the additional information prior to our call. Laura and I are not in the office on Friday, so possibly we can push our call to early next week? After 3:30 PM EST on Monday or after 12:00 PM EST Tuesday currently works for us.

Another area we are interested in discussing is any impacts local ordinances that discourage the sale of 2<sup>nd</sup> generation ARs and their impact on what you all see. I realize it may be a bit early to assess the impacts of these local ordinances, but we are interested nonetheless.

Best,  
Rusty

Hi Rusty,

I can't do tomorrow at 1:30PST/4:30EST. I could do earlier or later on Tuesday but am unavailable tomorrow from 1:00-2:00pm PST. Sorry, that came up after I sent my last email. I am still available on Friday after 11am PST/2pm EST if that works better for you.

I will have the core data along with break outs by: Reason for Intake, City Found, Age, Species, average levels of the seven AR's the lab tests cover, numbers of animals who tested positive for exposure plus an additional drilled down break out of how many of those positives were trace and how many were recordable levels above trace. I won't have that ready to send by tomorrow afternoon but if we don't have the call until Friday, I can get it to you before then. Here's a link to an email we sent our members that quotes some of our data.

Who else will be on the call?

Kelle

Good Morning Kelle,

We greatly appreciate you making yourself available for us.

How about tomorrow at 4:30 EST? Is there any literature on the Rodenticide Diagnostics & Advocacy Program we can review before our call?

Best,  
Rusty

Hi Rusty,

Thanks for following up! I have been out of the office for a couple of days for the holiday.

I can make myself available next week to go over WildCare's Rodenticide Diagnostics & Advocacy Program results from 2012. Tuesday or Friday after 2pm your time are best for me. Let me know what works for you.

Hello Kelle,

I hope you are well. I wanted to follow up on the wildlife incident data WildCare collected last year and to see if you are available to chat either tomorrow or next week.

Best,

Rusty

Thanks Again Kelle,

I am sorry for the health troubles you are experiencing and I hope you feel better. We will be ready to review WildCare's materials when they are be made available. It is ok if it takes a little longer, we have other things to work on too ; )

Regards,

Hi Rusty,

Just a quick check in to let you know that I am still working to gather information and drill down WildCare's data to support the EPA's cancellation of certain rodenticides. I expect to have the info. to you by the end of the week. I have been experiencing some fairly serious health problems and have missed quite a bit of work over the last two weeks. They do seem to be resolving now and I'm starting to feel well enough to work again. I sincerely hope this does not pose any inconvenience.

I realize the importance of this issue and providing EPA with WildCare's data and the related projects are still my top priority.

Kelle
